## Amendments to the Claims:

The listing of claims will replace all prior versions, and listing, of claims in the application.

## Claims 1-12 (canceled)

- therapy wherein the radiation therapy causes side effects in the subject, the improved method comprising administering to the subject a side-effect reducing amount of a medicine comprising a selective cyclooxygenase-2 inhibitor as the effective agent, the selective cycloxygenase-2 inhibitor being effective to decrease radiation-caused gastointestinal effects, radiation-caused fatigue, reduce radiation-caused diarrhea; reduce radiation-caused rectal bleeding, and reduce symptoms of radiation-caused urinary frequency, dysuria, and nocturia.
- 14. (New) The method of claim 13, wherein the cyclooxygenase-2 inhibitor is refecoxib.
- 15. (New) The method of claim 13, wherein the cyclooxygenase-2 inhibitor is celecoxib.
- 16. (New) The method of claim 13, wherein the reduced side effect comprises radiation-caused effects on the gastrointestinal tract.
- 17. (New) The method of claim 13, wherein the radiation-caused side effect is fatigue.
- 18. (New) The method of claim 13, wherein the radiation-caused side effect is diarrhea.

## 09/884,466

- 19. (New) The method of claim 13, wherein the radiation caused side effect is rectal bleeding.
- 20. (New) The method of claim 13, wherein the radiation-caused side effect is urinary frequency.
- 21. (New) The method of claim 13, wherein the radiation-caused side effect is dysuria.
- 22. (New) The method of claim 13, wherein the radiation-caused side effect is nocturia.
- 23. (New) The method of claim 13, wherein the cyclooxygenase-2 inhibitor is administered orally, topically, parenterally, or by inhalation spray.
- 24. (New) The method of claim 23, wherein the cyclooxygenase-2 inhibitors is administered as a tablet, troche, lozenge, aqueous or oily suspension, dispersible powder or granule, emulsion; hard or soft capsule, syrup or elixir.
- 25. (New) The method of claim 24, wherein the selective cyclooxygenase-2 inhibitor is administered in a dosage amount of about 0.01 to 200 mg/kg of body weight of the subject.
- 26. (New) The method of claim 25, wherein the selective cyclooxygenase-2 inhibitor reduces the side effects by at least 25%.
